## **PRESS RELEASE** *September 2007*

### **Cost-effective filtration for the beverage industry**

Microfiltrex have responded to the beverage industry's desire to produce high quality products at lower cost by offering fit for purpose filtration solutions. As a result, one leading UK brewery has achieved filtration cost savings of 40% in its packaging plant alone. Included in the range are prefilters and fully validated sterile filters manufactured in clean rooms from FDA-approved materials.

"Our experience in filtration allows us to offer cost-effective solutions with high throughput and long life in an optimised filtration system. Following years of filtration success with blue-chip beverage companies we understand the customer's process and aim to share this knowledge," says Bob Wilkinson, General Manager, Microfiltration.

Microfiltrex is a division of the Porvair Filtration Group, a specialist porous media and filtration company that designs and manufactures high performance filters and filtration systems for a wide range of industries.

For further details please contact Bob Wilkinson on +44 (0)1329 228163 or email [info@porvairfiltration.com](mailto:info@porvairfiltration.com)
