PRESS RELEASE *July 2007*

Drug Master File for BioVyon®

Porvair Technology's BioVyon®, a porous polymeric material, has been successfully incorporated in a Drug Master File (DMF). Manufactured to cGMP standards in an ISO 9001-accredited facility, BioVyon® is ideally suited to *in vitro* diagnostic kits, sample preparation devices and medical products. Available in hydrophobic or hydrophilic media with the added advantage of functional chemistry, BioVyon® can be customised and encapsulated to optimise separation, filtration and concentration techniques.

“This provides further confidence in BioVyon® as a safe and suitable medium for the diagnostic, medical and pharmaceutical industry “ says Roy Rigby, Market Manager.

Porvair Technology is a division of the Porvair Filtration Group, a specialist porous media and filtration company, with expertise in a wide range of media and many years experience in filtration. The Porvair Filtration Group designs and manufactures high performance filters for the most demanding environments in industries including aerospace and defence, chemical process, power generation, oil and gas, pharmaceutical and healthcare, air and water.
