## **PRESS RELEASE**

***March 2004***

### **New Gas Sensor Technology**

Porvair Technology based in Wrexham, report significant growth in the production of porous sintered stainless steel media for ATEX approved gas sensors. Strict control of sinter and housing quality are critical for this very demanding application.

‘Our ability to control both pore size and density gives our customers the quality products they need to succeed in this safety critical market’ says Steve Overthrow, Technical Manager

Porvair Technology is a division of the Porvair Filtration Group, a specialist porous media and filtration company, with expertise in a wide range of media and many years experience in filtration. The Porvair Filtration Group designs and manufactures high performance filters for the most demanding environments in industries including aerospace and defence, chemical process, power generation, oil and gas, pharmaceutical and healthcare, air and water.
