

## Specialist Aerospace Filtration

Typical single aisle civil aircraft use in excess of 150 Porvair filters.

These components and assemblies are used for contamination control in hydraulic, fuel, lubrication, coolant and air systems.

### Primary Flight Control

- Filter modules
- Main system elements
- Bypass valves
- Differential pressure indicators
- Last chance filters
- Screens

### Secondary Flight Control

- Filter assemblies
- Last chance filters
- Screens
- Main system filters
- Differential pressure indicators
- Filter modules

### Auxiliary Power

- Main system filter
- Filter assemblies
- Acoustic baffles
- Last chance filters
- Screens

### Braking and Landing Gear

- Filter housings
- Last chance filters

### Environmental Control

- Filter panels
- Air particle separators
- Air conditioning panels
- Acoustic baffles
- VOC and Ozone reduction

### Avionics and Supplementary Systems

- Filter modules
- Main system elements
- Bypass valves

### Anti Icing

- Last chance filters

### Fuel Tanks

- Strainers

### Fuel Tank Inerting

- Filter assemblies
- Filter elements
