

# In-Line Porous Plastic Filter

A fully integrated polypropylene filter media precision manufactured into a polypropylene housing.

This in-line porous plastic filter has excellent chemical compatibility to inkjet fluids. The high efficiency filters give long service life and are bonded for minimal extractables.

## Ordering Information

**Product Code:** 6122

## Typical Applications

- Inkjet

## Specifications

### Filter Code

6612

### Materials of Manufacture

Filter media: Polypropylene  
Housing material: Polypropylene

### Micron Rating

5µm, 10µm

### Dimensions

Filter length: 61mm (2.4")  
Filter width: 11mm (0.43")

### Connectors

Slip taper

### Maximum Operating Pressure

6bar (87psi)

### Operating Temperature

From 0°C to 50°C (32°F to 122°F)
